

The screenshot shows the MimioStudio Gallery application window. On the left, a toolbar contains icons for New Folder, Insert File, Copy, Paste, Delete, Import Content Pack, and Export Content Pack. Below these icons are labels and arrows pointing to the corresponding icons. The main window displays a search bar, a folder tree with 'Mathematics' selected, and a 'Mathematics' category tab. Below the category tab are sub-tabs for Images, Templates, Multimedia, and Lessons. A gray area is visible below these tabs. A callout box on the right explains how to expand the category tabs and drag objects into the gray area.

Features:

- + **Search Bar** allows you to quickly search for content by keyword.
- + **Expanding Folder Structure** makes it simple to organize/access files.
- + **New Content Packs** make lesson planning easy. Download them to the Imported Content Packs folder to preview the contents prior to installing.
- + **Drag-and-Drop** function lets you add new content quickly—just drop it into the gray area below the Category Tabs.

Click anywhere on the Category Tabs to expand.*

Then drag and drop objects onto your MimioStudio Notebook pages.

* Lessons tab not part of default Gallery for MimioStudio 9, but can be automatically added by dragging/dropping INK, PDF, or DOC files into the main Gallery folder or any subfolder, or into the gray space below the categories.
