

# MimioQuickLearn

## Mimio Interactive Systems: Setup and Overview

This one-hour, live, online training session provides participants with the knowledge they need to begin operating the MimioInteractive Xi and/or MimioTeach™ systems effectively in their classroom.

Participants will learn how easy it is to set up their own interactive device—everything from powering the interactive system, to calibrating it, to using it daily. Participants will consider ways they can begin using their interactive Mimio device to enhance their own teaching.

Participants will:

- Download and install MimioStudio™ software.
- Review hardware for the Mimio Interactive Xi and/or MimioTeach™
- Learn how to power up your interactive Mimio device.
- Learn how to connect your interactive Mimio device.
- Learn how to attach your Mimio bar.
- Learn how to calibrate your interactive system.
- Review the functions of the bar and stylus buttons.

During the session, participants will have the opportunity to ask questions and interact with the software. Participants who successfully complete the session will advance their Mimio skills and understand how to use MimioStudio software more effectively.

We encourage participants to attend additional sessions to maximize their abilities with Mimio products and bring their teaching into the 21st century!
